# vakhs

PLATFORM ALL

Users are forced to choose between collaboration and customisation.

MARKET OVERVIEW

High Collaboration, Low Customisation:

Platforms like Facebook, Instagram, Amazon, and Uber offer extensive collaboration but limit users to predefined data structures and interactions.

High Customisation, Low Collaboration:

Tools like Salesforce, Airtable, Google Sheets, or custom-built apps offer flexibility in data structuring but lack seamless, wide-ranging collaboration capabilities.

FLEXIBLE

notion
airtable
ms access
google sheets   vakhs

CLOSED   PLATFORM

whatsapp   facebook

DEFINED

We're vakhs and we want to platform all and every.

Users, Objects, Sharing

Person 1   Manufacturer

A father and fo...   Celebrity

An employee at Delivery...

School   Cinema

Assignments   Payroll

Order   Lectures   Backlog

Stories   Write to Us

Bookings   Files   Vlog

R

E   W

Individual, Group, Business, Organisation, everyone can be a user on vakhs.
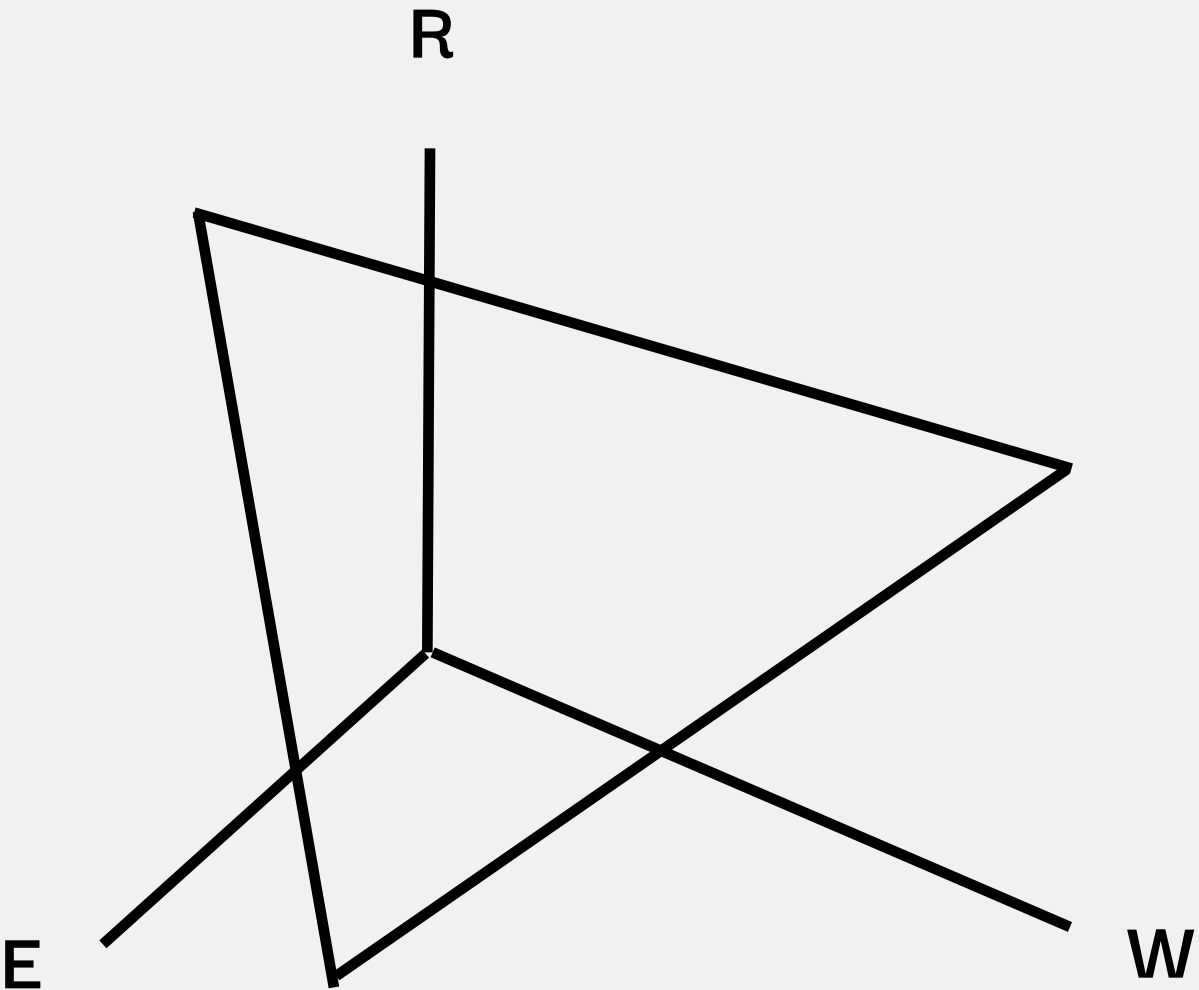

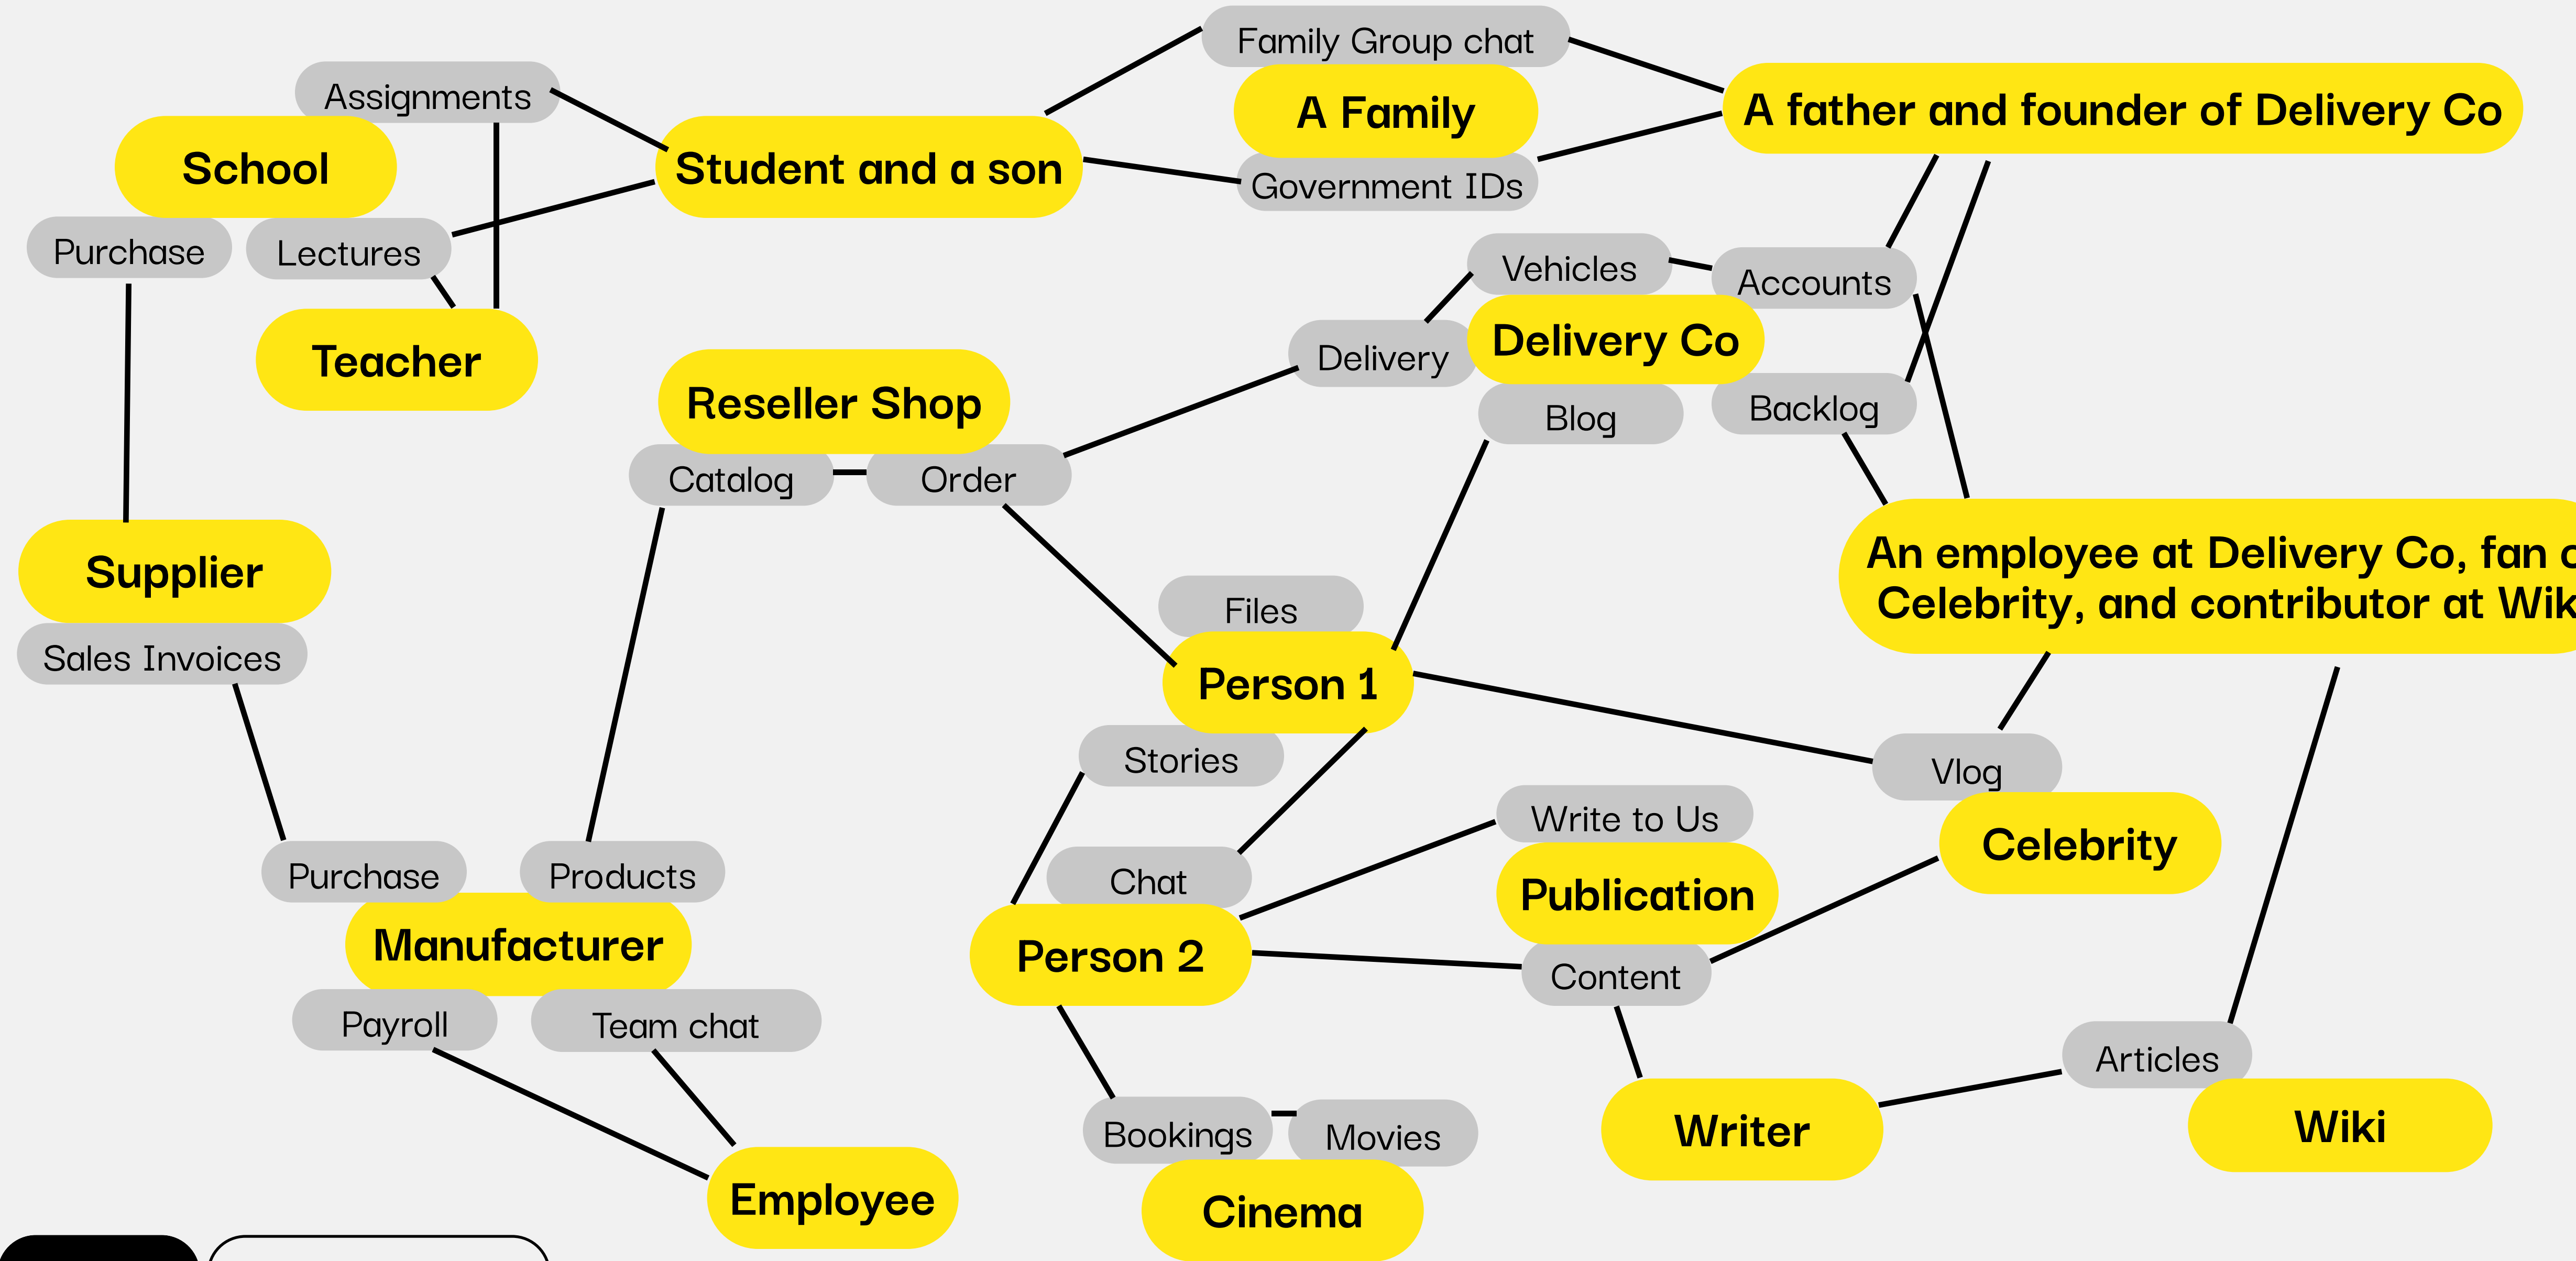

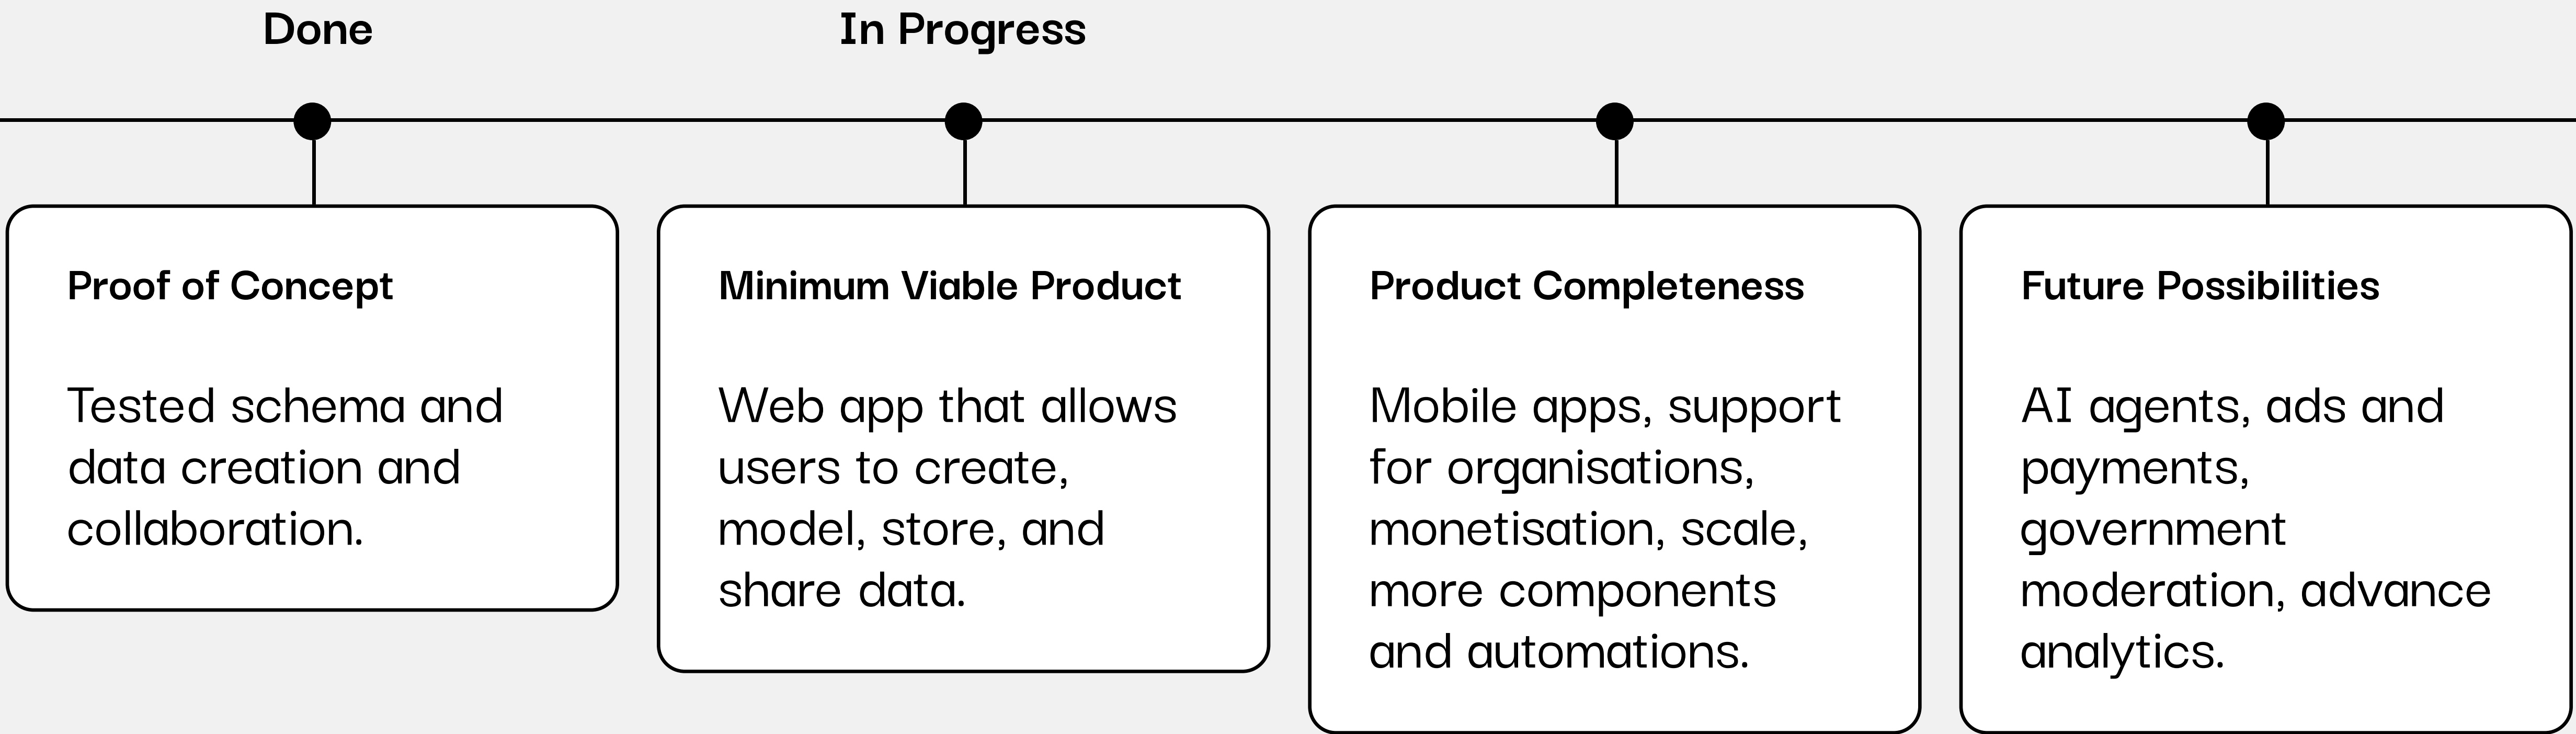

Users can create Objects and add records to them.

Users can give read/write/edit access on objects and records to other users.

VAKHS   CONFIDENTIAL

INFINITE POSSIBILITIES

Where we are today and here's how we pace ahead.

Done

In Progress

Proof of Concept

Tested schema and data creation and collaboration.

Minimum Viable Product

Web app that allows users to create, model, store, and share data.

Product Completeness

Mobile apps, support for organisations, monetisation, scale, more components and automations.

Future Possibilities

AI agents, ads and payments, government moderation, advance analytics.

Thank you
